How-to Prep Concrete and Wood Surfaces

PREP CONCRETE SURFACES

PEELING COATINGS

For previously coated concrete surfaces, use a paint stripper to remove loose or peeling paint.

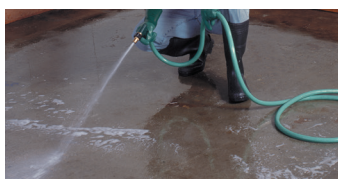

ETCH CONCRETE

Clean and etch the surface until it feels like 150 grit sandpaper. Coatings will have a stronger bond to etched surfaces.

RINSE

Rinse the surface thoroughly and allow it to dry.

PRIME CONCRETE

Prime with No. 880 Concrete & Masonry Bonding Primer.

PREP WOOD SURFACES

PEELING COATINGS

For previously coated wood surfaces, strip old and peeling coatings with No. 64 BEHR PREMIUM® Wood Stain & Finish Stripper followed by No. 63 All-In-One Wood Cleaner to neutralize the wood.

WEATHERED WOOD

Clean with wood cleaner such as No. 63 BEHR PREMIUM® All-In-One Wood Cleaner.

RINSE

Rinse the surface thoroughly with a garden hose or pressure washer and allow it to dry.
